

What's Next for Cloud Security?

**Real Talk About Surviving
Multi-Cloud Mayhem.**

The cloud is bigger, faster, and leakier than ever. Here's how to stay ahead before the next breach headline drops.

nasscom Gartner Says

Multi-Cloud = Mega Risks

- 1 70% of Indian enterprises now run on multi-cloud
But only 38% feel truly secure.
- 2 Security incidents tied to cloud complexity are
up 45%.
- 3 SaaS is scaling fast-security policies? Not so much.

NASSCOM + Gartner's 2025 Cloud Report agrees:
complexity is the new attack surface.

If you can't see across your clouds, attackers already have a map.

Cloud Security Threats for 2025-26 (Brace Yourself)

- 1 Misconfigurations = still the #1 breach cause.
- 2 Shadow IT: growing faster than your policies can track.
- 3 Compliance is getting tighter - India's DPDP Bill, GDPR, HIPAA, and more.
- 4 SaaS apps leaking creds = wide open doors.

IBM's 2024 Cost of a Data Breach report: Avg. breach cost in cloud infra? \$4.75M. You can't afford "good enough."

Strategy 1

Automate or Get Owned

CSPM > Constant Stress Posture Management

- 1 Automation catches 80% of misconfigurations before attackers do (Gartner CSPM Guide).
- 2 Briskinfosec ran a CSPM audit for a SaaS client → 27 critical gaps closed in 7 days.

Move from firefighting to foresight. Let your tools think faster than attackers can.

Strategy 2

Zero Trust That Actually Works IRL

- 1 Identity-first access: no trust, no entry.
- 2 Micro-segmentation: no movement across workloads.
- 3 Continuous checks: no static credentials, ever.

Healthcare orgs we work with? Zero Trust isn't optional
-it's life-or-death-level serious

Strategy 3

Make Compliance Work For You

Real-Time Compliance > Audit-Time Panic

- 1 Regulations are going real-time. Are you?
- 2 Our clients get live dashboards, instant alerts, and peace of mind.
- 3 Saves 60% of the time prepping for audits.

Compliance Benchmarks 2025

Treat compliance like a product feature-not a checkbox.

Multi-Cloud Mastery in Action

Managing security across AWS, Azure, and Google Cloud felt impossible until Briskinfosec implemented their automated CSPM solution. We went from discovering breaches after damage to preventing them before they happen. Our board finally sleeps peacefully.

— CTO, Fintech Industry

Trusted by leading brands

Security-First Brands Win Trust (and Market Share)

“Chasing threats is yesterday. Anticipating them is tomorrow.”

- 1 Proactive = security, compliance, and strategy in one motion.
- 2 The smartest orgs we work with? They're not just patching-they're designing for resilience.
