

API SECURITY TESTING

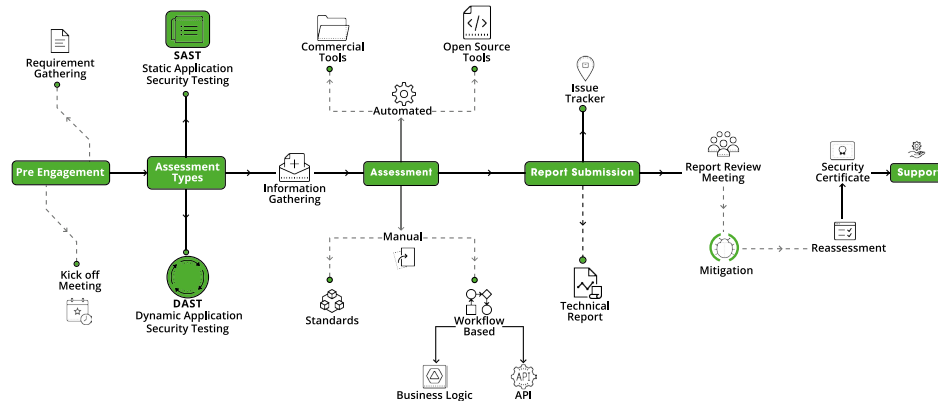

API Security Assessment

API Penetration Test

Securing API Communication

API Security Testing

Briskinfosec API Penetration Test is an authorized hacking attempt aimed at identifying and exploiting vulnerabilities in the architecture and configuration of an API. Briskinfosec ensure that the API, supporting backend Infrastructure and Authentication are secure. We combine some advanced manual tests with automated vulnerability scans to ensure all critical vulnerabilities are identified.

Approach

BriskInfosec process is tailored to fit your requirements and is highly effective in protecting your business from losing confidential and valuable information.

Standards we follow

- > OWASP
- > OSSTMM
- > NIST
- > PTES

Duration and Commercials

Our **API Security Assessment** package starts from \$1500 and the duration for security assessment is around 1 to 4 weeks

Below Key Parameters helps us to give you right estimation. Request a quote to contact@briskinfosec.com or Call and Consult with our experienced team for right advice.

Scope Of the API security assessment, Architecture Complexity, Number of API, In-house or Third Party API, Onsite/Offsite Execution, Time frame, Short Time/Long time contract.

Target Segments
