- IOT Application Security

IOT Security Testing

Briskinfosec IOT Security Testing is combination of security test done with the IOT wireless network, data, mobile application and cloud security. Testing software and systems for IoT also involves physical, sensory and emotional interactions because today's digital devices not only work based on keystrokes, but also respond to our touch, motion, and voice. This makes "Human Experience" testing also a very crucial part of testing IoT security.

Approach

Briskinfosec process is tailored to fit your requirements and is highly effective in protecting your business from losing confidential and valuable information.

Standards we follow

› We follow the **OWASP** standards for Internet of Network Penetration testing

Duration and Commercials

Our IOT security assessment package starts from $2000 and the duration for security assessment is around 1 to 4 weeks.

Scope Of the security assessment, IOT Network and Application Complexity, Onsite/Offsite Execution
Number of Sensors involved, Time frame, Short Time/Long time contract.

Below Key Parameters helps us to give you right estimation. Request a quote to contact@briskinfosec.com or Call and Consult with our experienced team for right advice.

Target Segments

- Financial
- IT
- Artificial Intelligence
- E-Commerce
- Block Chain
- Healthcare
- Online Service
- Aerospace
- Energy & Utility Sectors
- Retail Organizations
- Non-profit Organizations
- Telecom Sector
- Private/Public
