Source Code Security Assessment

Source Code review

Source Code review discovers hidden vulnerabilities, design flaws, and verifies if key security controls are implemented. Briskinfosec provides Secure Code Review audits and the source code for an application to verify the proper security controls are present, source code work as intended have been invoked in all the right places. We offer Static Code Security Test (SCST) and Dynamic Code Security Test (DCST). Briskinfosec assessment help you to find what types of problems exist and helps the developers of an application to understand what classes of security issues are present.

Approach

BriskInfosec process is tailored to fit your requirements and is highly effective in protecting your business from losing confidential and valuable information.

Standards we follow

- > OWASP
- > SDLC
